Image 1: Add water | Image 2: 12-24 hours | Image 3: After 24 hours | Image 4: They grow, grow, grow!

INSTRUCTIONS:

- 1 - Put the egg in a container and fill it with water until it covers the egg. [The water temperature should be under 35°C (95°F)].
- 2 - The egg shell will slowly start to break after 12-24 hours and the pet will hatch. [Please keep the container full].
- 3 - After the egg shell is completely broken change the water. [The pet will keep growing for 48 hours].
- 4 - You can put the pet in a larger container to watch it grow.
